EvalSuite Project Archive

It is with great pride that we officially close a chapter of the EvalSuite legacy, and dedicate this site to our former friend and colleague, **Sue Wright**. We began this endeavor almost twelve years ago. Sue was a major contributor and the primary author of **EvalAdmin**, **EvalFolio**, and **EvalToolkit**. We are busy building the next generation of evaluation tools, and can no longer support the software distributed on this site. It will remain online as historical documentation and our way of thanking and remembering Sue.

Susan Wright (1958 - 2007)

EvalSuite is an online evaluation system developed by [Richard Rathe](#) and [Susan Wright](#) in the University of Florida [Office of Medical Informatics](#). **The system has logged hundreds of thousands of course, clerkship, faculty, and peer evaluations since 1995.** In 1997 we abandoned paper forms and began collecting standardized patient data with laptops in the [Harrell Professional Development and Assessment Center](#). Initial Release

grew to include the **NBME clinical skills assessment pilot program**. In 1999 the system was extended to include online examinations. In the Spring of 2000 the College of Medicine dedicated a [computer-based testing center](#) to facilitate paperless examinations on a large scale. In 2003, [XAM](#) replaced evalCGI for high stakes testing. Version 5.0.2 is the first public release of this software since July 2001.

This software is copyrighted by the University of Florida.

Conditions and restrictions on its use are listed in the opening comments of each EvalSuite script file. By downloading this software from this site, you are agreeing to abide by those conditions and restrictions.

Use of this software does not imply permission to modify or distribute it.

This software may be downloaded for use at an individual site and may not be further distributed without explicit permission from the authors.
